With respect to Applicant's submitted Form PTO 1449, it is noted that the Patent Abstracts of Japan reference was not considered, as it was not received.

Claims 3-11 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim must be in the alternative (i.e. claim 3) and multiple dependent claims cannot depend on another multiple dependent claim (i.e. claims 4-11). See MPEP § 608.01(n). Accordingly, claims 3-11 have not been further treated on the merits.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Cook et al (US Patent No. 5,760,082), Satter et al (US Patent No. 5,770,247), Cook et al (WO 96/38137), and Cain et al (WO 97/18320).

Cook et al (US Patent No. 5,760,082) teach dietetic foods containing CLA (see entire document, especially column 5, lines 5-14 and the claims).

Satter et al (US Patent No. 5,770,247) teach a milk containing an increased CLA content (see entire document, especially claim 1).

Cook et al (WO 96/38137) teach the addition or formation of CLA in food products (see entire document, especially page 11, lines 1-8 and page 12, lines 10-37).

Cain et al (WO 97/18320) teach the addition of CLA to food products (see entire document, especially Examples 12 and 13).

It is noted that milk is an emulsion.

All of the claim limitations have been considered. None of them are seen as serving as basis for patentability.

No claim is allowed.
